Summary

Backend Developer with strong experience building secure, scalable, and reliable backend web applications using Node.js, Express, JavaScript, TypeScript, MongoDB, PostgreSQL, and Prisma ORM. Skilled in API development, authentication (JWT/OAuth), Docker, CI/CD basics, database modelling, and payment integrations. I have hands-on experience designing backend systems end-to-end: routing, middleware, data validation, error handling, role-based access control, caching, logging, and deployments. I enjoy solving real business problems, improving performance, and collaborating with product teams to build reliable software.
